HDPE CORRUGATED CONDUIT

CDT Underground, LLC., supplies HDPE corrugated conduit used to protect cables in underground conduit systems. This flexible HDPE product can be pulled in short distances through a main conduit, used for additional cable protection inside manholes or hanholes, and protection of cable in aerial applications.

HDPE corrugated conduit is available in sizes 1" to 2" in continuous lengths on reels or coils in numerous colors and stripe combinations for ease of identification.

Options available include a coextruded inside wall liner for improved cable jetting speeds and longer pulls, pre-installed pull tapes and ropes and sequential foot or meter markings.

Markets served by CDT include CATV, telecommunications, utility and DOT.

CORRUGATED SPECIFICATIONS

DUCT SIZE	NOMINAL OD	MIN WALL	MAX WALL	WT/FT (LBS)	WORKING LOAD (lbs)
1"	1.330	0.045	0.065	0.121	500
1-1/4"	1.550	0.045	0.065	0.141	500
1-1/2"	1.800	0.055	0.075	0.165	500
2"	2.265	0.055	0.075	0.196	500
